

A Custom Dashboard Created to Work for You

Our fully customizable dashboard just got better. On your TTS home screen, you can now view not only Quotations, but also your Projects. Pull in the projects you want to monitor daily by simply checking them off, and then customize the view by either graphic charts or numerical data. Save tons of time, stress and paper keeping track of your ongoing projects and where they are in the pipeline. Our continual goal is to minimize your admin duties so you can focus on the sales!

If you would like a brief tutorial video on setting up your Dashboard, click [here](#)

What Customers are Saying

Shaun Pollart
Managing Partner - Pollart
Electrical Sales

“ We run our business on the TTS platform, we use inventory control, sales tracker, CRM, Purchase order online filing plus quotation tracker. We could not do the volume we do without TTS. TTS helps us be a more organized company. We are able to track everything we do so we can tell our story to our customers and factories.

Susan Landreth
Executive Assistant - Electra
Products Group

“ We use the TTS system in many ways. Our CEO uses Recent Sales Input, Recent Sales Reports, and TOE's Check Inventory on a regular basis. Our outside sales team uses the CRM program for all daily sales calls. Our inside staff uses Recent Sales Input and Recent Sales Report daily. Personally, being the IT person in my office, I update employees, vendors, customers, and all company data.

James Yore
President - Coresential

“ TradeTech Solutions software is the operating system that we use to drive our business. We utilize the complete platform of TTS modules which enables us to provide real time information to our manufacturers, distributor and customers. It's actually simplified our business by reducing noise and helps focus our team members on activities that drive real sales results. ”

TradeTech Solutions is proud to be the technology service provider for [NEMRA](#).
